

## How to install RailCOMPLETE

Welcome as a prospective RailCOMPLETE user!

Please follow the steps below to install RailCOMPLETE on your computer. By installing RailCOMPLETE the first time, you will automatically be awarded a free license giving you enough time to use the “Request license” button under the command RC-ManageLicense in order to request a more long-lasting license code from us.

The Google Chrome and Internet Explorer readers are known to behave well with our installation web page.

Enjoy!

With regards from the  
RailCOMPLETE Support Team

## How to install RailCOMPLETE®

1. Locate our download site and click the link [web trial download - https://www.railcomplete.com/webtrial/](https://www.railcomplete.com/webtrial/).

### Free RailCOMPLETE trial version download

A free, time-limited trial version of RailCOMPLETE can be obtained from the [web trial download](#) page. Do not hesitate to email us at [license@railcomplete.no](mailto:license@railcomplete.no) for extending your trial period and get more information about how your organization can benefit from using RailCOMPLETE.

System requirements:

- AutoCAD (the three latest editions, but older editions will usually work fine – only not the Lite versions)
- PC with Windows 10 Pro, powerful enough to run AutoCAD

## How to install RailCOMPLETE®

2. If you are a new user to RailCOMPLETE, you will be asked to fill in a short registration form. Press "Register" to proceed.

Logged in as qwerty (claus.feyling@railcomplete.no) Log out

RailCOMPLETE will run without license for about a week.

**Still curious?**

If you wish to extend your free license period, then click on the "Request New License" button inside the RailCOMPLETE license manager (or use the RC-ManageLicense command) and send us the auto-generated email, containing necessary details about you and your computer. You will then receive a 60-days free license.

**Take it to the next level!**

If you are curious about using RailCOMPLETE to support your BIM processes, please don't hesitate to send us an email to [license@railcomplete.no](mailto:license@railcomplete.no) describing your needs. We will revert to you with a suggestion on how to proceed.

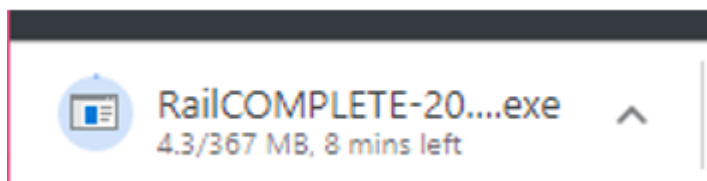

**System requirements:**

- AutoCAD (the three latest editions, but older editions will actually work fine — only not the Lite versions)
- PC with Windows 10 Pro, powerful enough to run AutoCAD

5. Click the "Download installer" link. With Chrome you will see that the file loads:

...and when completed, click on the file download tab to start the installation process:

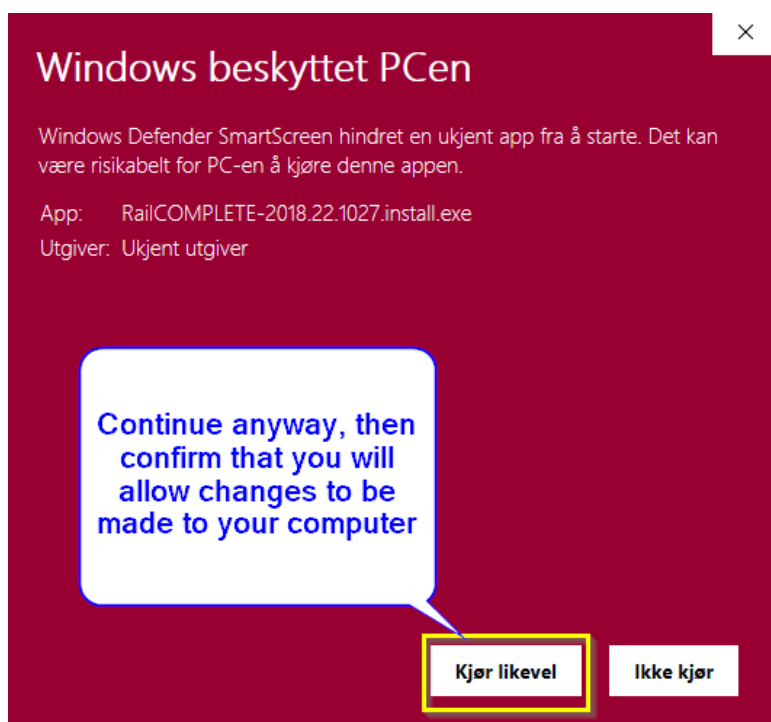

6.  **IMPORTANT**  
Make sure that all your AutoCAD programs have been closed. An open AutoCAD application will block certain system files and the RailCOMPLETE installation will stop.
7. Click on the file tab to start the installation process. You might see a warning that this installation file has not yet been centrally acknowledged by Windows – this message will only go away when a sufficient number of users have accepted to install this application – nothing to do about that 😞. Click “More info”:

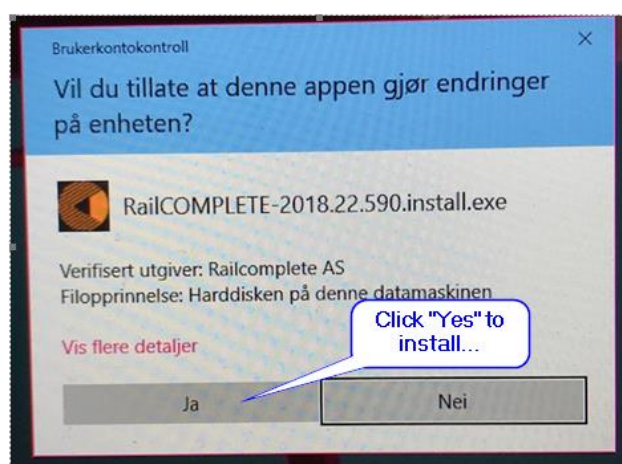

8. ...and click "Install anyway":

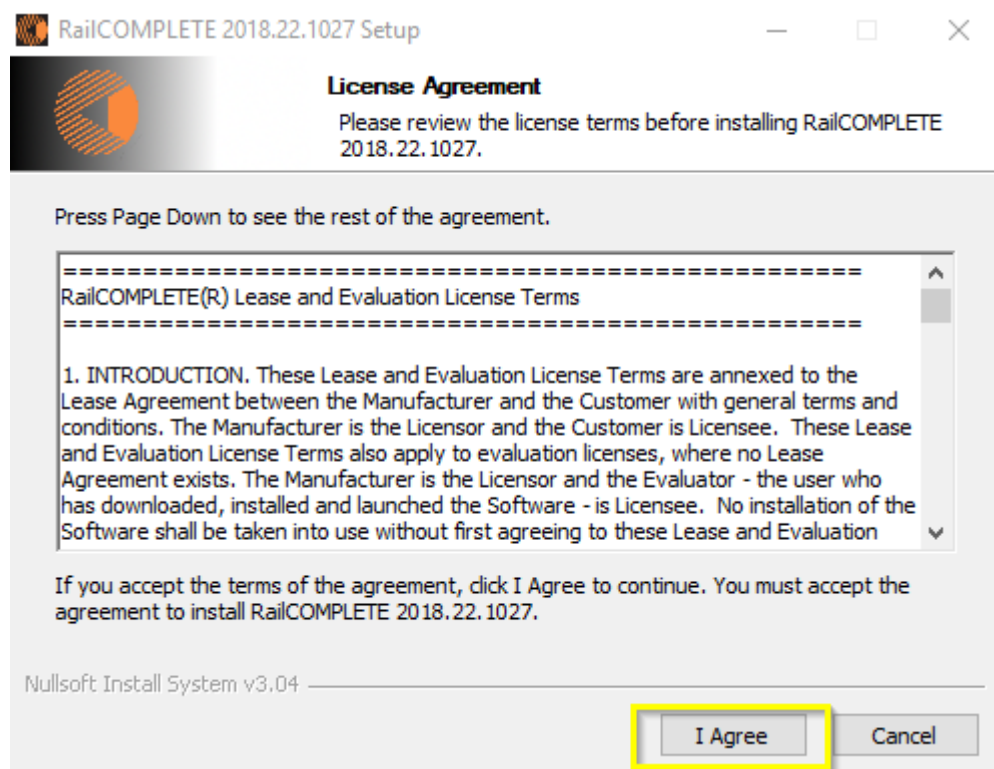

9. When asked, please confirm that you allow the RailCOMPLETE installer to make changes to your computer:

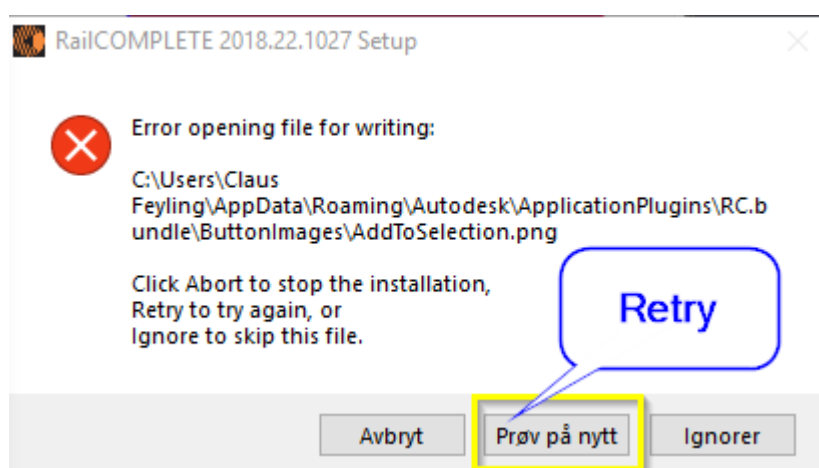

10. Follow the remaining steps. Please accept the EULA in order to start the file installation:

11. If you have forgotten to close all AutoCAD windows the installation process will be hindered and stop with a warning. Just close all AutoCAD processes and continue the installation.

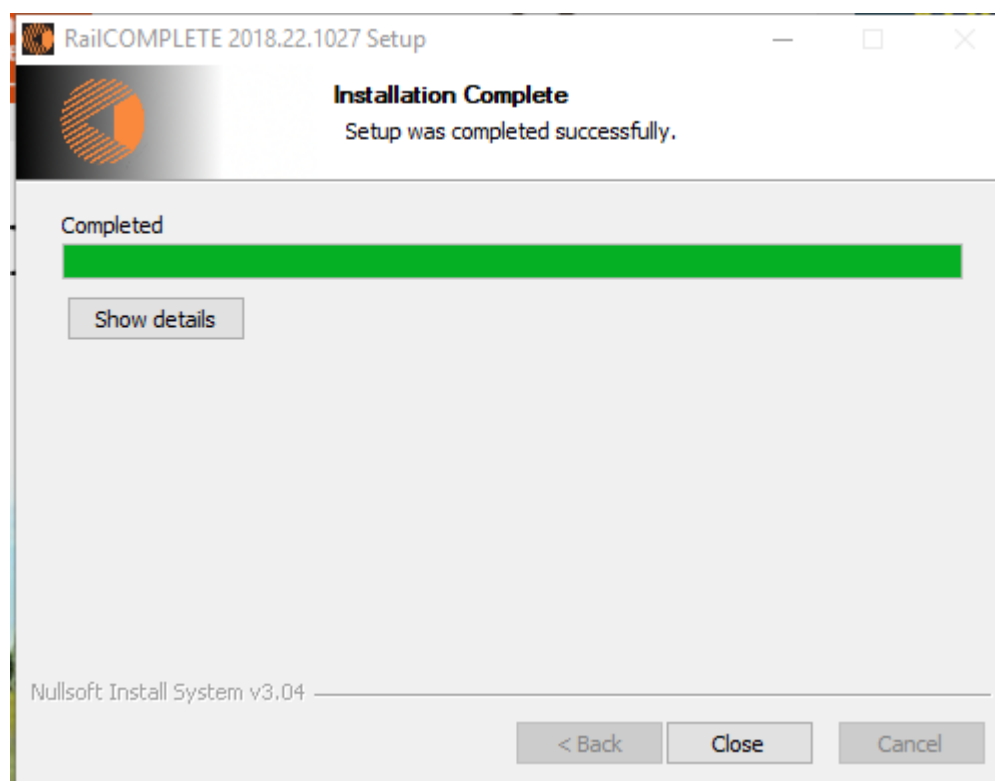

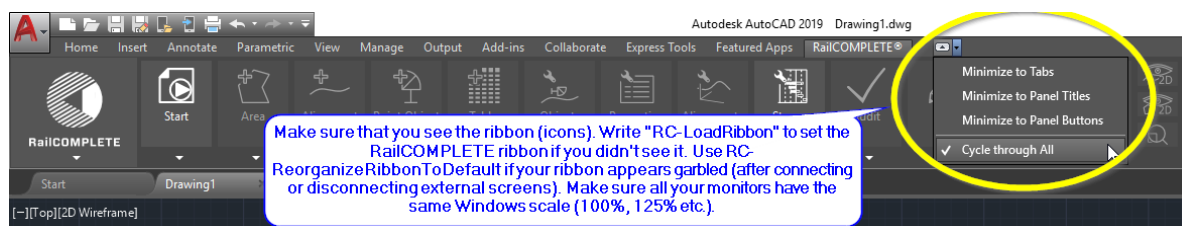

## How to install RailCOMPLETE®

12. You should see this window when the installation has succeeded:

13. You may now start AutoCAD again. RailCOMPLETE will load automatically.

14. Make sure that you see the RC ribbon. Use command RC-LoadRibbon to set the RailCOMPLETE ribbon if you don't see it. Use RC-ReorganizeRibbonToDefault if your ribbon appears garbled (this happens when disconnecting and reconnecting extra screens). Make sure that all your screens (monitors) have the same Windows screen scaling (100%, 125%, 150% or larger), otherwise AutoCAD will garble some of your windows.

15. Thanks for installing RailCOMPLETE!
